Ted Angel is the Executive Director for the Advanced Technology Office (ATO) at the Defense Innovation Unit (DIU). In this role, he is responsible for advisement, expansion, and retention of talent within the organization. Ted's career spans over 20 years of service in the Department of Defense (DoD) and Intelligence Community (IC), with extensive experience leading and managing high-performance technical teams and driving mission impact.

Tyler Bell is DIU's Vice President of California Business Initiatives, leading efforts to expand the organization's presence in the state and strengthen its ties to the region's innovation ecosystem.

Bell's background in electrical and computer engineering, combined with his experience in the U.S. Navy, informs his approach to building partnerships that connect commercial technology with national security needs.

Previously, Bell led DIU's Regional Partner and Ambassador Program, where he helped establish relationships with universities, startups, and industry leaders across the country. Before joining DIU, he served as a Surface Warfare Officer in the Navy, completing deployments in the Indo-Pacific and Middle East.

Dr. Joseph A. Heber, a member of the Senior Executive Service, is the Director of the Office of Strategic Capital (OSC) within the Office of the Under Secretary of Defense for Research and Engineering (OUSD(R&E)). In this role, he leads the Department's efforts to implement the statutory mission of the OSC, which is to enhance the production capacity and supply chain resilience of critical technologies and to accelerate the transition of technologies, materials, and processes from the laboratory to the field.

Dr. Heber began his career in the Office of Naval Research (ONR) in the Mechanical Systems Division's Engineering Sciences and Materials Departments. He then served as Program Officer for the Naval Undersea Warfare Center's Division Newport Technical Director's Office. Dr. Heber has a Ph.D. in Mechanical and Aerospace Engineering, a B.S. in Physics, and a B.S. in Mechanical Engineering. He is also Project Management Professional certified.

Sean Coffman is Managing Director at CSL Analytics. He has been a leader in the defense industrial base for over 20 years, supporting the Department of Defense.

His recent activities include research and development (R&D), strategic planning, and business development. He has led efforts to develop and implement R&D strategies for the Air Force Research Laboratory (AFRL) and the Air Force Life Cycle Management Center. He has also led efforts to develop and implement strategic plans for the Air Force Test Center and the Air Force Sustainment Center.

Sean's previous activities include leading the Air Force Materiel Command's Propulsion Directorate, the Air Force Research Laboratory's Power & Electrical Engineering Team (the Answering Office), and the Air Force Research Laboratory's Aerospace Systems Directorate's Power Division.

Peter DeMarinis is a Global Research Systems Engineer and Program Manager at Google. He leads the Global Research Systems Engineering (GRSE) team building the Global Defense Agency software to serve as the digital backbone for Google's defense and national security engagements.

Prior to joining Google, Peter was a Senior Executive Service member of the Global Research Directorate, Science, and Laboratory Management Office at the Defense Intelligence Agency.

Peter has led multiple digital engineering innovation initiatives and has been a key contributor to the Department of Defense's digital engineering strategy and policy. He has also led efforts to integrate artificial intelligence, machine learning, and data analytics into engineering, cyber survivability modeling, and enterprise data management.

Christopher H. Garnett, a Senior Level Executive in the Technical Director's Office at the Naval Surface Warfare Center, Dahlgren Division (NSWCDD), leads the Center's Digital Engineering Transformation Office. He is responsible for leading the Center's digital engineering strategy development, engagement and implementation to support the Navy's Digital Transformation Initiative. Mr. Garnett has been a leader in the Navy's digital engineering transformation since 2018.

Mr. Garnett spent over 27 years of active duty service in the US Navy, retiring as a Captain in 2015. He served as the Chief Engineer for the Navy's Littoral Combat Ship program and as the Program Manager for the Center for Electronic Warfare. Mr. Garnett has been with the Center at the Dahlgren Division for Engineering and Technical Management since 2015. He has a B.S. in Electrical Engineering from the University of Virginia and a M.S. in Systems Engineering from the Naval Postgraduate School. He is also a graduate of the Defense Acquisition University's Senior Service College Fellowship Program.

Tim Grayson leads the NAVY MARINE TIGHT LIGHT™ organization to provide the Navy and Marine Corps with a resilient, secure, and affordable communications capability.

Tim has a distinguished career that extends both government and industry. He retired from the Navy as a Captain after serving as the Program Executive Officer for Command, Control, Communications, Computers, and Intelligence (PEO C4I) and Space Warfare Systems Command (SPAWAR) and as senior intelligence officer for the Navy's Cyber Forces. He has also served as the Chief Technology Officer for Northrop Grumman's Mission Systems sector and as a Vice President for Lockheed Martin's Rotary and Mission Systems business.

Tim also has extensive industry experience. He joins BAE Systems from Leidos, Inc., where he was Vice President and Chief Engineer for the Defense Solutions Group. Before joining Leidos, Tim was the founder and president of Technology Mission Research, LLC, a company that provided C4ISR engineering and technical support to the Navy and Marine Corps.

Mr. James M. Griffenhorst, a senior level executive, is the Technical Director for Systems and Weapons Test and Evaluation, for Naval Surface Warfare Center, Dahlgren Division.

Mr. Griffenhorst has served in the Navy and Marine Corps and in the intelligence community. He has a distinguished record of operational authority in amphibious and weapons test and evaluation.

Mr. Griffenhorst has been a leader in the Navy's digital engineering efforts and is the digital lead for the Test and Evaluation Technical Authority. He has been a leader in the Navy's Digital Transformation Initiative and has led efforts to develop digital engineering strategies, policies, and guidance for the Navy's Test and Evaluation Enterprise. He has also led efforts to develop digital engineering capabilities and processes for the Center and the Navy. He received his B.S. in Physics from the University of Maryland, College Park, and his M.S. in Physics from the Naval Postgraduate School.

Mr. Hector Guevara is currently working as the Strategic Advisor for the Defense Engineering Corporation (DEC) where he helps companies navigate the complex defense landscape, develop strategic partnerships, and position themselves for success in the defense market. Mr. Guevara has over 30 years of experience in the defense industry, with 20 years in a military and leadership position followed by 10 years in industry.

Mr. Guevara's military career began as an enlisted Marine and ended as the assistant deputy commandant, aviation. During his military career, he served in a variety of leadership positions, including as the commanding officer of Marine Aviation Logistics Squadron 16 and as the Marine Corps' liaison officer to the National Air & Space Intelligence Center (Wuhan Operations). Mr. Guevara's industry career began at Lockheed Martin, where he served as the director of Global Sustainment and Training for the F-35 program. He then served as the director of Global Sustainment and Training for the Aegis Combat System program at RTX before joining DEC.

Robert Hamilton is the co-founder and CEO of Bryce, a 150-employee company that is building the world's most powerful platform for 3D content and spatial computing. He brings deep expertise in computer graphics, software engineering, and the intersection of technology and creative industries.

At DTS, Robert was appointed to the American Made Regional Challenge Steering Committee by Secretary Chris Wright.

Prior to founding Bryce, Robert was a software engineer at Pixar and a member of the Digital Domain 3.0 team.

Robert holds a B.S. in Computer Science from the University of Rochester and an M.S. in Computer Graphics from Cornell University.

Dr. Patrick Kaster is the Principal Machine Learning Engineer at DIU. He has served as lead developer of several key pipelines supporting the Department of Defense's Project Maven.

Dr. Kaster has years of experience in military and commercial engineering environments. He specializes in developing and production deployment of machine learning models for computer vision, natural language processing, and multimodal applications.

Dr. Kaster has a Ph.D. in Computer Science with a focus on dynamic presentation of scientific journals, books, and conferences. His dissertation was titled "Dynamic Publication Model for Neural Network Library." He has a B.S. in Computer Science from the University of Illinois Urbana-Champaign and a B.S. in Mathematics from the University of Illinois Springfield.

Crystal Lewis is the Director and Portfolio Manager for Defense Innovation Unit's Cross-Domain Fusion (CDF) Task Force. She leads the Department's efforts to integrate and operationalize artificial intelligence and machine learning capabilities across the joint force.

Crystal has over 20 years of experience in military and commercial engineering environments. She specializes in developing and production deployment of machine learning models for computer vision, natural language processing, and multimodal applications.

Crystal has a B.S. in Computer Science from the University of Illinois Urbana-Champaign and a B.S. in Mathematics from the University of Illinois Springfield.

Dr. Jon Bornholdt is the Principal Machine Learning Engineer at DIU. He has served as lead developer of several key pipelines supporting the Department of Defense's Project Maven.

Dr. Bornholdt has years of experience in military and commercial engineering environments. He specializes in developing and production deployment of machine learning models for computer vision, natural language processing, and multimodal applications.

Dr. Bornholdt has a Ph.D. in Computer Science with a focus on dynamic presentation of scientific journals, books, and conferences. His dissertation was titled "Dynamic Publication Model for Neural Network Library." He has a B.S. in Computer Science from the University of Illinois Urbana-Champaign and a B.S. in Mathematics from the University of Illinois Springfield.

Dr. Joseph A. Wellbelove serves as the Digital and Strategic Capabilities Lead for the Defense Innovation Unit's Cross-Domain Fusion (CDF) Task Force. He leads the Department's efforts to integrate and operationalize artificial intelligence and machine learning capabilities across the joint force.

Dr. Wellbelove has specialized expertise in AI, Digital Twins, Modeling and Simulation, and Digital Engineering.

Dr. Wellbelove has a B.S. in Aerospace Engineering from the University of Bristol, an M.S. in Aerospace Engineering from the University of Southampton, and a Ph.D. in Aerospace Engineering from the University of Bristol. He is also a graduate of the Defense Acquisition University's Advanced Program Management Course.
